

# Specialized Supply of Polymer Raw Materials

---

Granules | Regrind | Scrap | Compounds

Products & Services Catalogue

2026

## Our Goal Is Simple

To deliver clearly specified material that can be sampled before purchase and tested in the customer's production process.

Supply Based on Real Needs

# Plastix: A Reliable Link Between Supply and Production

We have built a specialized network to identify, assess and supply polymer raw materials, currently focused on recycled polypropylene and real production-line requirements.

### Targeted Supply

Material selected to suit the application and budget

### Initial Screening

Visual inspection, sampling and injection testing when required

### Follow-through to Delivery

Order, transport and production-feedback coordination

# Our Current Portfolio Focuses on Polypropylene

## Clear & Natural PP Granules

Suitable for evaluation in injection-moulded parts

## White & Coloured PP Granules

Supplied according to sample and application

## Black PP Granules

A cost-effective option for dark products

## PP Regrind & Flakes

Sacks, straps, crates and sorted material streams

## PP Scrap & Live Production Waste

Spot or continuous supply, subject to availability

# Sample, Specifications and Application Guide Every Selection

Each lot may have different characteristics. Our final offer is therefore based on a sample from that specific lot and the customer's application data.

## Colour & Appearance

Clear, natural, white, coloured or black

## Processing Method

Injection moulding, extrusion or blending

## Acceptance Criteria

Test results, process stability and part quality

# Our Order Process Reduces Decision Risk

Application, colour, volume and price range

Define  
Requirements

1

Identify suitable material within our supply network

Select an Option

2

Visual review and production testing

Provide a Sample

3

Confirm specifications, quantity and delivery terms

Approve & Order

4

Coordinate loading and record production results

Delivery &  
Feedback

5

# Why Industrial Customers Choose Plastix

## Reliable Supply

A multi-supplier network that reduces dependence on one source

## Transaction Transparency

Clear samples, lot specifications and delivery terms

## Pre-purchase Control

Sampling and production testing before the main order

## Data Traceability

System records for customers, products, suppliers and transactions

## Integrated Coordination

One contact point for selection, ordering, transport and follow-up

## Specialized Focus

Initial focus on PP for deeper product and market knowledge

## Partnership Starts with a Sample

**After receiving the details, we review available options and arrange a suitable sample.**

Price and availability are confirmed at the time of enquiry.

Send these four details to receive a suitable offer:

Polymer type and part application

1

Required colour and quality

2

Consumption or order volume

3

Available sample, photo or technical data

4

# PLASTIX

**Reliable Supply, Consistent Quality**

Plastix Polymer Supply
